

Adapters – Part 2

Adapter Labs

[MC]²

Will Sobel
System Insights

MTCONNECT[®]: CONNECTING
MANUFACTURING CONFERENCE

Agenda

- Review adapter toolkit in C#
- Step 2: Add an Emergency Stop event
- Step 3: Add Controller Mode and Execution
- Step 4: Add the Program and Message
- Step 5: Add Position and Load samples
- Step 6: Add some Conditions
- Step 7: Add a Cutting Tool
- Step 8: Add Audio Time Series

This is the last slide!

- The remainder will be hands on
- We have prepared each step in a separate project directory
- If you get lost, open the project at the current step to catch up
- Start by opening the “start” project...

Ok, one last slide

- This framework and lab is provided under the apache 2.0 license
- You may use it, redistribute it, and incorporate it in your products per the license
- No royalties are required and there are no dependencies on any licensed software
- Please submit bug fixes and enhancements!
